

R REVIT

Course Title: Revit for BIM Management

Course Duration: 2 days, 9am – 4.30pm
or 4 days 2 x 100 min each

Course Delivery: Remote, min. 3 students

Requirements: Internet, Headset

Course Material: Aipal based

Course Confirmation: AIPAL certificate

Revit for BIM Management

Use Revit® to drive efficiency and accuracy across the architectural project life-cycle, from conceptual design, visualization and analysis to fabrication and construction:

You will learn how to:

- Manage your BIM projects from conceptual stage to key delivery.
- Automatically update Revit families while your model develops.
- Let Revit handle routine and repetitive tasks with automation so you can focus on higher-value work with the help of the course topics as per below:

Session 1

- Getting started with projects and working with consultants files
- Templates, shared parameters, content standards, Dynamo scripts and player.

Session 2

- Using Revit interoperability tools
- Understand classification systems

and how to apply those classification systems within Revit

- An Introduction to COBie
- Checking your Revit Models

Session 3

- Using CTC Suite of tools
- Effectively manage content

- Ensure your schedules are clean and correct
- Perform project health checks
- Find elements that have been mirrored

Session 4

- PowerBI Dashboards for health checks
- How to analyze the data
- How to clean a project file

Why Learning with AIPAL?

We are certified Autodesk Trainers with huge experience, our courses run every month.

We believe in the potential of the Construction and Engineering industries to change the world for better. Through our combined efforts we can contribute to efficiency & innovation of our clients and their clients.
